

Inspection & Maintenance

In an inspection, the status of your machine is checked and assessed precisely and conscientiously by our service engineers. Our staff prepare, based on a machine-specific checklist, a detailed testing protocol with recommendations for optimising the machine or for exchanging spare and replacement parts. The defined spare and replacement parts, which we offer you at an attractive package price, are subsequently exchanged as part of maintenance. In this way, safety and quality standards can be satisfied and machine downtime reduced to a minimum through regular inspection and maintenance.

■ Your Benefits

- ✓ Precise knowledge of the status of your machine
- ✓ Professional maintenance according to a model-specific checklist increases the operating safety of your machine/ system
- ✓ Increase in machine availability through preventive repair
- ✓ Avoidance of expensive consequential damage
- ✓ Replacement of parts by competent service engineers
- ✓ Use of original WAFIOS spare parts
- ✓ Price advantage due to the package price for a replacement parts package
- ✓ Tips from WAFIOS service engineers on how to avoid operating errors
- ✓ Optimal coordination of appointments minimises travel costs and therefore the machine downtime

■ Service Agreements

Careful and regular maintenance assures that the functionality of your machine is preserved for many years. We offer service agreements that include, in addition to other services, preventive repairs by WAFIOS service engineers at a fair price.

As part of this agreement, we can create a repair plan matched to your needs, and compare and adapt the scheduling to the specifications of our design personnel. Our service agreements offer further advantages - please ask us about them.

We will gladly provide you with further information.
