

FUL 93 Retrofit

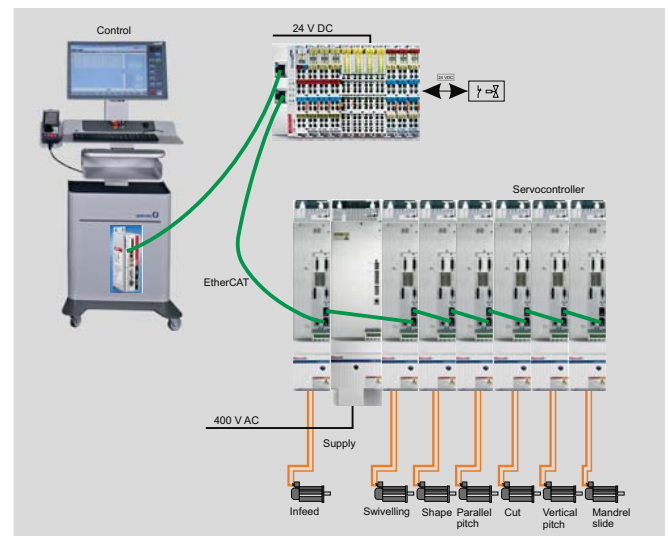

An electrical retrofit of the FUL 93 includes:

- Conversion to PC-based computer system with WAFIOS Programming System WPS 3.2 EasyWay
- New switch cabinet with control panel carriage and hand-held operating device
- New servomotors for feed unit with new feed gears
- New servomotor control for the shape axis, the parallel pitch axis, the swivel axis and the mandrel slide
- New servomotor control for our reliable hydraulic cutting drives

Your benefit:

- Value of your machine is increased
- Clearly structured, modern user interface with WAFIOS software WPS 3.2 EasyWay
- Stabilization of the production process
- Existing tools can be used
- Ecological: The existing, robust machine body is combined with up-to-date, efficient technology
- The availability of spare parts is ensured by using latest technology and reducing operating costs
- Online support / diagnosis via VPN connection
- Possibility to retrofit new options
- Enhanced quality and reduction of downtimes
- Ensuring and increasing the productivity of the machine

We are looking forward to your inquiries and orders.
