

# Added Value by WAFIOS Spare Parts

## The difference between an assembly and an individual component

**More than just a spare part:**  
**We offer spare part assemblies tailored to your requirements.**

Our system of numbers tells you whether you get an individual component or an assembly. We recommend to buy the whole assembly. In our experience, there is frequently a lot more worn than just the individual component. As our assemblies are pre-assembled completely or in parts, their replacement is easier and more efficient. You benefit from shorter downtimes, cost savings and a warranty on the whole assembly.

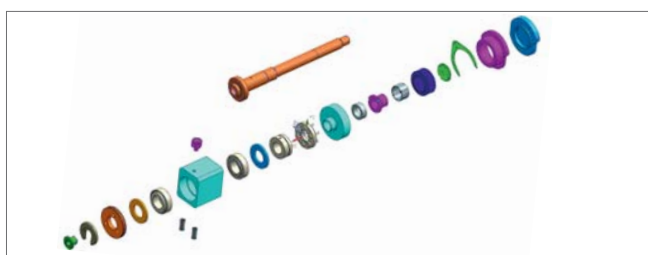

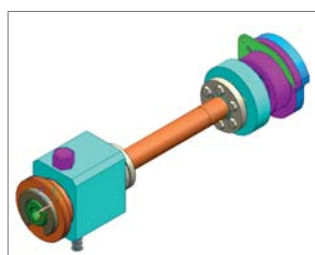

There are assemblies that can only be replaced as a whole assembly because the individual components have been fitted and adapted to each other.

### Numbering system at WAFIOS

The superordinate assembly 2185-3-046000 may contain subassemblies as well as individual components.

	Type number		Group	Index
Superordinate assembly	2185	<b>3</b>	0460	00
Subassembly	2185	<b>4</b>	0461	00
Individual component with drawing	2185	<b>5</b>	0460	00
Individual component without drawing	225059
