Tool Changing System

The cutting tool holder with insert for the rotary cut quickly generates cost advantages as the number of tungsten carbide parts required is reduced and the duration that wearing parts can be used is extended. The tool’s slim structure increases the available installation space and thus the range of parts that can be produced.

Machine Types:
- FUL 45
- FUL 46
- FUL 56
- FUL 63
- FUL 75

Result from field test FUL 45
Cutting different CrSi spring steel wire Ø = 2.8 - 3.5mm

Our Accomplishments for your Benefit
- Simple change of tools - plug & cut!
- All four sides of the cutting tool insert can be used which reduces costs
- Larger installation space
- Robust clamping system due to flush-mounted clamp
