

convert for bending machines

Automatic Conversion of CAD Data to WPS Geometry Programs

Situation:

Setting up components based on CAD data, frequently requires a lot of time and work for preparing the relevant geometry values and manually entering them into the programming system of the machine.

Your benefits:

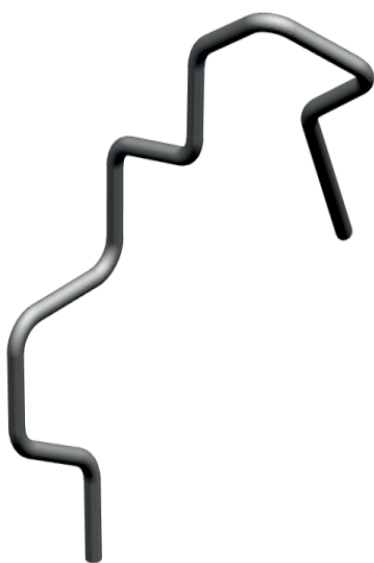

- Operator assistance by simplified set-up
- Fast, easy and accurate import of geometry values

Solution:

iQconvert enables the conversion of CAD data from IGES or STEP format into WPS geometry programs. This minimizes set-up work and errors during manual programming.

Available machine types:

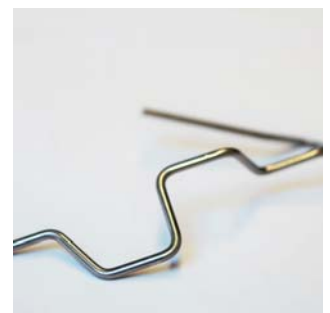

- BM machines
- BMU machines
- BMS machine
- BT machines
- BMZ machines
- RBV machines
- BL machines
- TWISTER² machines
- Compatible machine sizes on request
